

### Ejercicio 4

$\text{todoCyG}.\text{[]} = \text{True}$  **(1)**

$\text{todoCyG}.(x:xs) = \text{circulo}.x \wedge \text{tam}.x \geq 10 \wedge \text{todoCyG}.xs$  **(2)**

$e \in_l \text{[]} = \text{False}$  **(3)**

$e \in_l (x:xs) = (e == x) \vee e \in_l xs$  **(4)**

$\text{todoCyG}.xs \equiv \langle \forall y : y \in_l xs : \text{circulo}.y \wedge \text{tam}.y \geq 10 \rangle$  **(HI)**

**Caso base:**

$$\begin{aligned} \underline{\text{todoCyG}.\text{[]}} &\equiv \langle \forall y : y \in_l \text{[]} : \text{circulo}.y \wedge \text{tam}.y \geq 10 \rangle \\ &\equiv \{\text{Por (1)}\} \\ \text{True} &\equiv \langle \forall y : y \in_l \text{[]} : \text{circulo}.y \wedge \text{tam}.y \geq 10 \rangle \\ &\equiv \{\text{Por (3) } e:=y\} \\ \text{True} &\equiv \underline{\langle \forall y : \text{False} : \text{circulo}.y \wedge \text{tam}.y \geq 10 \rangle} \\ &\equiv \{\text{Rango Vacio de } \forall\} \\ \text{True} &\equiv \text{True} \\ \text{True} &\end{aligned}$$

**Caso inductivo**

$$\begin{aligned} \underline{\text{todoCyG}.(x:xs)} &\equiv \langle \forall y : y \in_l (x:xs) : \text{circulo}.y \wedge \text{tam}.y \geq 10 \rangle \\ &\equiv \{\text{Por (2)}\} \\ \text{circulo}.x \wedge \text{tam}.x \geq 10 \wedge \text{todoCyG}.xs &\equiv \underline{\langle \forall y : y \in_l (x:xs) : \text{circulo}.y \wedge \text{tam}.y \geq 10 \rangle} \\ &\equiv \{\text{Por (4)}\} \\ \text{circulo}.x \wedge \text{tam}.x \geq 10 \wedge \text{todoCyG}.xs &\equiv \underline{\langle \forall y : (y == x) \vee y \in_l xs : \text{circulo}.y \wedge \text{tam}.y \geq 10 \rangle} \\ &\equiv \{\text{Particion de rango de } \forall\} \\ \text{circulo}.x \wedge \text{tam}.x \geq 10 \wedge \text{todoCyG}.xs &\equiv \underline{\langle \forall y : (y == x) : \text{circulo}.y \wedge \text{tam}.y \geq 10 \rangle} \wedge \langle \forall y : y \in_l xs : \text{circulo}.y \wedge \text{tam}.y \geq 10 \rangle \\ &\equiv \{\text{Rango unitario de } \forall\} \\ \text{circulo}.x \wedge \text{tam}.x \geq 10 \wedge \text{todoCyG}.xs &\equiv \text{circulo}.x \wedge \text{tam}.x \geq 10 \wedge \underline{\langle \forall y : y \in_l xs : \text{circulo}.y \wedge \text{tam}.y \geq 10 \rangle} \\ &\equiv \{\text{Por Hipótesis Inductiva}\} \\ \underline{\text{circulo}.x \wedge \text{tam}.x \geq 10 \wedge \text{todoCyG}.xs} &\equiv \underline{\text{circulo}.x \wedge \text{tam}.x \geq 10 \wedge \text{todoCyG}.xs} \\ &\equiv \{\text{Reflexividad de la equivalencia}\} \\ \text{True} &\end{aligned}$$
